SPECIAL FOCUS: INSTRUMENTATION AND AUTOMATION

33 Improve refinery production and efficiency with asset monitoring
M. Donnangelo

39 Dynamic simulation for FGRS design and controllability analysis
Y.-H. Chou and T.-Y. Hong

45 Advanced process control metrics: Closing the loop on APC performance
A. Kern

49 New cable sealing system offers cost and maintenance savings for processing plants
M. A. Rie

PROCESS OPTIMIZATION

53 Revamp results for CCR catalytic reforming unit with atmospheric regenerator
A. Kniuakta, W. Piriayawitwong and N. Pipithvittaya

57 Process design consideration for a deep-cut vacuum distillation unit—Part 1
H. Bhatia, A. Kim and K. Nangia

61 Reconstruct a vacuum column injector system using computer modeling—Part 2
E. S. Telyakov, E. V. Osipov and D. Bugenbe

ENVIRONMENT AND SAFETY

65 The benefits of unmanned aerial vehicles in plant inspection services
M. Smith

SUPPLY CHAIN

69 Bringing Industry 4.0 to the terminal
R. Kessler

FLUID FLOW AND ROTATING EQUIPMENT

75 Phenomenon of flow distribution in manifolds
S. Jain, R. Patil and A. Gupta

79 Understand API and ASME standards to prevent oversizing PSVs
B. Taylor

Cover Image: Fluor executes a wide range of design and construction projects for clients in the refining market, from single-unit revamps to multi-billion-dollar grassroots petroleum refining complexes. Photo courtesy of Fluor.
