SPECIAL FOCUS: CLEAN FUELS

31 Convert LCD to gasoline with a high RON
J. Dong, A. Mao, J. Lang, J. Zhang, X. Chang and J. Tang

35 Composite ionic liquid alkylation technology
gives high product yield and selectivity
Z. Li, X. Zhang, A. Meng, H. Liu, C. Xu, X. Zhang and W. Chang

39 Upgrading the bottom of the barrel
R. Elshoury, J. Bailey, L. Brown and P. Nick

ENVIRONMENT AND SAFETY

47 Combating normalization of deviance within your organization
J. Cauld

PROJECT MANAGEMENT

51 Demolition of a refinery—site exit with many winners
K. Noi

PROCESS OPTIMIZATION

57 Dynamic simulation of integrated syngas, O2, and steam networks
for a gasification complex—Part 2
V. Dedrich, N. Kanevski, T. Mathew, G. Bhattacharyya, M. S. Sabina and P. Kottikkal

61 Flexibility in desalting operations for opportunity cruises
J. Makris, Y. Liu, J. Reul and T. Collins

65 Cost-effective revamp of CO2 removal systems
V. Arora

FLUID FLOW AND ROTATING EQUIPMENT

71 Preventing wire wooling journal bearing failure
K. Brasier

75 Simulation model of a vacuum heater transfer line
R. H. Wijaya

TERMINALS AND STORAGE

80 Keep a floating roof on an even keel
P. Bogberg

83 Prevent buckling of tanks with external rafters
J. Thorson

COLUMNS

7 Editorial Comment
The future of refinery-sulfur need not apply
19 Reliability
Consider stainless steel tubing for mechanical tool connections
21 Automation Strategies
Top technology brands in automation for 2018
23 Refining
Russia plans ramp-up in refinery expansion, construction
25 Viewpoint
Digitalization is key to increasing the process industry’s productivity
27 Digital
Operational excellence index—Part 2: The digital transformation

Cover Image: Marathon Oil is executing the $1.5 B-53 B South Texas Asset Re-positioning (STAR) program, which will unitize the 4,595ktd Gulf Coast Refinery and 88-Mtpd Refinery at Texas City, Tex. (shown). The project, due to be completed in 2021, will form the fully integrated 566-Mtpa Gulf Coast Refinery-Texas City refining complex. The STAR project will enable the two refineries to achieve the US EPA's updated Tier 3 gasoline sulfur standards. Photo courtesy of Marathon Oil Corp.
