PROCESS OPTIMIZATION
33 Use advanced predictive analytics for early detection and warning of column flooding events
   J. Bird, J. Brown Burns, Y. Racette and J. Beaulieu
41 Use an Excel-based method to evaluate performance for the preheat train of a CDU
   J. K. Moon and G. S. Chang
51 Remove carbonyls from gaseous hydrocarbon streams for ethylene plant service
   J. M. Gondolfe and S. A. Kurukchi
57 Managing process contaminants in amine treating units—Part 1: Lean amine filtration
   D. B. Engel and S. Northrop
69 Novel FCC technologies based on reaction chemistry of catalytic cracking
   C. Xie, X. Wei, J. Gong and J. Long

PROCESS CONTROL AND INSTRUMENTATION
73 Advanced process control of debutanizers makes use of inferential predictions
   L. Ferrari, P. Harrison, and Y. Z. Friedman

MAINTENANCE AND RELIABILITY
79 Simplification reduces risks and cuts costs
   A. Bozick

PROJECT MANAGEMENT
81 Creating a 'win-win' between construction contractor and project owner—Part 2
   J. Berg, G. Shahani and C. Rentschler

COLUMNS
7 Editorial Comment
   What is the future role of the process engineer?
15 Reliability
   Consider today's canned motor pumps
16 Automation Strategies
   Open process automation moves to the proof-of-concept stage
17 Refining
   German refining industry on the verge of consolidation and production cuts
19 Africa
   Challenges facing harmonized fuel standards in East Africa
21 Engineering Case Histories
   Case 101: Preventing crankshaft failures in large reciprocating engines
25 Viewpoint
   Electric vehicles vs. the perfect battery
27 Viewpoint
   Toward a world of cleaner fuels
29 Digital
   Looking to boost safety? Reliable operations are the key
