SPECIAL FOCUS: PETROCHEMICAL TECHNOLOGY
29 Modeling and optimization of pressure distillation to achieve pharma-grade THF
V. Shirpurkar
35 Energy losses from the radiant firebox wall of pyrolysis furnaces
A. Bueno, V. Regueira and L. Leite
41 CFD simulation in chemical reaction engineering
R. Aglave and T. Eppinger
49 Establishing a plastics processing sector in NE India—A short analysis
P. Phukan

PROCESS ENGINEERING
55 Aqueous chemistry principles applied to refinery processes
R. Cardoso

PROCESS OPTIMIZATION
63 Speed up the development of new commercial adsorbents—Part 1
B. Sungho, W. Wittanadecha and W. Tanthapanichakoon
69 An optimized approach to choosing solvent for the liquid-liquid extraction process
A. Gupta and S. Jain
73 Enhancing refinery profitability with a novel offgas conversion technology
A. Aronson, D. Zaziski and D. Carter

MAINTENANCE AND TURNARounds
M-77 Maintenance—A value-added expense
M. Rhodes and L. Nichols

ENVIRONMENT AND SAFETY
85 Optimize your insulation to reduce costs
J. Petersen, S. O'Hearn and M. Rabeh
89 How pipeline management becomes part of a plant safety strategy
C. Liston

PROCESS CONTROL AND INSTRUMENTATION
93 Measuring steam flow to flares
M. Menezes
