Now, CE is all about outcomes!
Rely on MIC to help you meet the ARRT’s new Structured Education Requirement

- Stay up to date on current trends in radiology!
- CT and MR registry preparation.
- CT and MR cross-training.
- MQSA compliance in Digital Mammography and Digital Breast Tomosynthesis.
- Best Money Back Guarantee in the industry!
- Choose from more than 150 titles—and 400 credits!

Technologists and their managers agree: “MIC’s courses really work!”

**The CT Registry Review Program**
- Covers every topic on the ARRT & NMTCB post-primary exams in CT.
- Pass the ARRT or NMTCB exams in CT or your money back!
- 17 Credits & 3 Study Modules.

**The MRI Registry Review Program**
- Covers every topic on the ARRT post-primary exam in MRI.
- It’s guaranteed: Pass the ARRT exam in MRI or your money back!
- 30 Credits & 12 Study Modules.

**The CT CrossTrain**
- Covers all the essentials of CT.
- Requires no prior training in CT.
- Explains CT so you’ll understand it!
- 17 Credits & 6 Study Modules.

**The MR CrossTrain**
- Covers all the essentials of MR.
- Requires no prior training in MR.
- Explains MR so you’ll understand it!
- 18 Credits & 4 Study Modules.

**Digital Mammography Essentials**
- Meets MQSA requirements for digital mammography training.
- Covers the essentials of digital mammography & requires no prior training.
- 11 Credits & 4 Study Modules.

**Digital Breast Tomosynthesis Essentials**
- Meets MQSA requirements for digital breast tomosynthesis training.
- Covers all the essentials of digital breast tomosynthesis.
- 8 Credits & 3 Study Modules.

**Radiology Trends for Technologists**
- Choose from over 100 hot topic review articles.
- Study Buddy helps you focus on relevant info.
- CT, MR, Mammography, PET, SPECT, etc.
- 1.5 to 4 credits for each "trend" title!

Every MIC course is accredited for Category A CE credits which are fully recognized by the ARRT & NMTCB.

**ON THE COVER**

The painting, "Eye Evolution,” by Kathleen Wald, portrays 3 artistic renditions of the eye. Along with the transformation of a newborn infant (top), a healthy adult eye (middle), and an aging eye with cataractous crystalline lens (bottom), highlights the structural changes in our eyes as we age.
