PILL VS. SKILL: There may be no quick fix for the complex challenge of low sexual desire in women.

PILL VS. SKILL: There may be no quick fix for the complex challenge of low sexual desire in women.

52 / The Hardest Word
The ability to say no when we need to is crucial to our mental health and self-confidence, but we go to extremes lengths to avoid ever having to utter the word. Here's how to start.
By Carlin Flora

62 / Quest for Fire
Low desire is the most prevalent sexual complaint of women. There's a battle raging among scientists over whether its origins are biological or psychological—and what that means for heating things up.
By Katherine Rowland

70 / In the Minds of Dogs
Bred for their ability to serve human needs, the animals who once were wolves are remarkably social creatures. How much they know about us and the world around them is now a hot question.
By PT Contributors

80 / The Big Data Bull's-Eye
Is big data the future of psychiatry? Computational techniques are helping to diagnose and treat patients with the thorniest of illnesses—even schizophrenia.
