Information for Patients about TALTZ (ixekizumab)
Read this information carefully before you, or your family member, start taking TALTZ and each time your prescription is refilled. This leaflet does not take the place of talking with your healthcare provider (HCP) about TALTZ. If you have questions about TALTZ talk to your HCP. Always follow your HCP’s instructions for taking TALTZ.

What is the most important information I should know about TALTZ?
TALTZ is a medicine that affects your immune system and may lower the ability of your immune system to fight infections. TALTZ may increase your risk of infections which can sometimes become serious.
- Your healthcare provider should check you for tuberculosis (TB) before you begin treatment with TALTZ and may treat you for TB if you have a history of TB or have TB.
- Your healthcare provider should check you for other infections during and after treatment with TALTZ.

What is TALTZ?
TALTZ is a prescription medicine used to treat adults:
- with moderate to severe plaque psoriasis and
- who may benefit from taking injections or pills (systemic therapy) or phototherapy (treatment using ultraviolet or UV light)

It is not known if TALTZ is safe and effective in children under 18 years of age. Who should not use TALTZ?
Do not use TALTZ if you have had a severe allergic reaction to ixekizumab or any of the other ingredients in TALTZ.

Before starting TALTZ, tell your HCP if you:
- have had a severe allergic reaction to TALTZ
- have an infection that does not go away or that keeps coming back
- have TB or have been in close contact with someone with TB
- think you have an infection or have symptoms of an infection such as:
  - fever, sweats, or chills
  - muscle aches
  - cough
  - shortness of breath
  - blood in your phlegm (mucus)
- weight loss
- warm, red, or painful skin or sores on your body
- diarrhea or stomach pain
- burning when you urinate or urine more often than usual
- have Crohn's disease or ulcerative colitis
- have recently or are scheduled to receive an immunization (vaccine). People who take TALTZ should not receive live vaccines. Prior to starting TALTZ, consider completion of all age appropriate immunizations according to current immunization guidelines.
- are pregnant or plan to become pregnant. It is not known if TALTZ can harm your unborn baby
- are breastfeeding or plan to breastfeed. It is not known if TALTZ passes into your breast milk.

After starting TALTZ, call your HCP right away if you have any of the symptoms of infection listed above. Do not use TALTZ if you have any symptoms of infection unless you are instructed to do so by your HCP.

How should I use TALTZ?
See the detailed “Instructions for Use” that comes with your TALTZ for information on how to prepare and inject a dose of TALTZ, and how to properly throw away (dispose of) used TALTZ autoinjectors and prefilled syringes.

Tell your HCP about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What are the possible side effects of TALTZ?
TALTZ may cause serious side effects, including:
- See “What is the most important information I should know about TALTZ?”
- Serious allergic reactions. If you have a severe allergic reaction, do not give another injection of TALTZ. Get emergency medical help right away if you get any of the following symptoms of a serious allergic reaction:
  - feel faint
  - swelling of your face, eyelids, lips, mouth, tongue, or throat
  - trouble breathing or throat tightness
  - chest tightness
  - skin rash
- Crohn’s disease or ulcerative colitis (inflammatory bowel disease) can happen with TALTZ use, including worsening of symptoms. Tell your HCP if you have new or worsening symptoms of inflammatory bowel disease during treatment with TALTZ, including stomach pain, diarrhea (with or without blood), weight loss.

The most common side effects of TALTZ include:
- injection site reactions, upper respiratory infections, nausea, and fungal infections. These are not all of the possible side effects of TALTZ. Tell your HCP if you have any side effect that bothers you or that does not go away. Call your doctor for medical advice about side effects.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
